

You said: pneumatic fitting AR 2000-02

The [AR 2000-02](#) is a standard industry code for a **1/4-inch BSP/NPT pneumatic air pressure regulator**. Originally designed by [SMC Pneumatics](#), this compact, modular part is widely manufactured by various industrial brands (such as Akari, Techno, and Aerotac) to control, stabilize, and maintain consistent downstream air pressure in compressed air systems. Code Breakdown

- **AR**: Identifies the product series as a standard standalone **Air Regulator**.
 - **2000**: Refers to the **body size and flow capacity** (2000 is the compact/miniature standard size).
 - **02**: Specifies the inlet and outlet thread port size, which is **1/4 inch**. [[1](#), [2](#), [3](#), [4](#), [5](#), [6](#)]
