

You said: PINE VALVE

"**Pine Valve**" primarily refers to commercial hardware, sanitary faucets, and industrial flow control devices manufactured under the **Pine** brand name or collection series.

Depending on your specific application, a pine valve usually falls into one of three main categories:

1. Sanitary Taps and Bathroom Fittings

Many domestic plumbing systems feature valves from specialized sanitary collections. [[1](#), [2](#), [3](#), [4](#)]

- **Angle Valves & Concealed Stop Taps:** Brands like [RN Valves & Faucets](#) market a signature "[G20 Pine Collection](#)" and "[Virtu Pine Collection](#)". These are high-grade engineering polymer (PTMT) or brass plumbing valves utilized to isolate and regulate water flow to bathroom geysers, washbasins, and kitchen sinks.
