

**Metal hose connectors** offer high durability and leak-resistant performance compared to plastic alternatives. They are widely used across plumbing, gardening, industrial machinery, and pneumatic tools. [\[1, 2, 3, 4, 5\]](#)

## Common Types of Metal Hose Connectors

- **Brass Fittings:** Highly resistant to corrosion and ideal for outdoor tap connections and standard garden hoses.
- **Quick-Connect Couplings:** Feature a push-and-click spring mechanism for fast, tool-free detachment.
- **Stainless Steel Braided Connectors:** Flexible hoses reinforced with woven metal mesh, commonly utilized for high-pressure water supply lines and appliances.
- **Pneumatic / Hydraulic Barb Plugs:** Heavy-duty steel connectors designed for industrial pressure equipment and fluid transfer systems. [\[1, 2, 3, 4, 5, 6, 7\]](#)  
To find the exact match for your needs, could you specify:
  - The **intended application** (e.g., garden hose, air compressor, kitchen plumbing)?
  - The **thread size or diameter** required?
  - Do you need a **quick-release mechanism** or a **permanent threaded joint**?
